## *New In-Wall Bracketing Products*

### Oatey® Sliding Wall Bracket Stub-Out Kits

The Oatey® Sliding Wall Bracket Stub-Out Kit provides a durable, adjustable solution for securing stub-outs in residential and commercial plumbing applications. Designed for versatility, the sliding bracket adjusts between 8 in. to 24 in. stud bays, eliminating the need for custom cutting. The kit includes a galvanized steel sliding bracket, two pre-attached stub-out clamps, and mounting screws for secure installation. The pre-drilled holes allow for precise pipe alignment, while the included plastic or metal clamps minimize movement and noise. Compatible with copper, PEX, and CPVC piping, this kit ensures a professional, code-compliant installation for new construction and remodels. To learn more about Oatey® Sliding Wall Bracket Stub-Out Kits, visit Oatey.com.

### Oatey® Light Angled Wall Bracket Stub-Out Kits

The Oatey® Light Angled Wall Bracket Stub-Out Kit provides a strong, versatile solution for securing vertical piping and horizontal stub-outs in residential and commercial plumbing installations. Spanning from 12 in. to 20 in., its adjustable design accommodates various stud spacings, making installation quick and efficient. The bracket features a hole pattern that allows for stub-out adjustments every 2 in. (± ½ in.), ensuring precise pipe positioning. Four mounting points enhance strength and stability, while adjustable ears can be secured with nails or screws for a custom fit. Made from durable galvanized steel, this kit delivers long-lasting performance and a professional, code-compliant installation. To learn more about Oatey® Light Angled Wall Bracket Stub-Out Kits, visit Oatey.com.

## Oatey® Self-Closing Pipe Clamps

The Oatey® Self-Closing Pipe Clamps offer a secure and versatile solution for supporting copper, steel, PEX, and CPVC pipes in both residential and commercial plumbing systems. Made from corrosion-free polyamide, these clamps are resistant to UV, aging, oil, and gasoline, making them suitable for both indoor and outdoor use. They are temperature-resistant from -40°F to 200°F constant, with a peak of 270°F. The clamps easily close by pushing the pipe into place and can be interlocked for running multiple pipes together. Designed for quick, tool-free installation, they can be mounted directly on studs or attached to brackets, struts, or threaded rods with separate accessories. Plenum rated and listed to ASTM E-84, these clamps ensure reliable, long-term performance. To learn more about Oatey® Self-Closing Pipe Clamps, visit Oatey.com.

## Oatey® Cushion Pipe Clamps

The Oatey® Cushion Pipe Clamps are designed for metal pipe applications, featuring a black EPDM rubber lining that protects against galvanic corrosion and reduces pipe noise. The one-piece design eliminates loose parts for easy installation, while the durable steel construction with a Zn-Mg coating ensures long-term performance. The three-way screw accommodates Phillips, flat, and hex screwdrivers. Plenum rated and UL2239 and C UPC (IAPMO) listed, these clamps provide secure support and reliable protection for both residential and commercial plumbing systems. To learn more about Oatey® Cushion Pipe Clamps, visit Oatey.com

## Oatey® Strut Pipe Clamps

The Oatey® Strut Pipe Clamps are designed for use with steel pipes and EMT conduit, offering secure support in plumbing installations. Featuring a one-piece design that eliminates loose parts, these clamps are easy to install and mount on strut channels, threaded rods, or directly on walls/ceilings for installation flexibility. The durable steel construction is coated with a high-grade Zn-Mg finish for corrosion resistance. The three-way screw accommodates Phillips, flat, and hex screwdrivers. UL2239 and C UPC (IAPMO) listed, these clamps provide reliable, long-lasting performance. For more information about Oatey® Strut Pipe Clamps, visit Oatey.com.

**Oatey® Combo Pipe Clamps**

The Oatey® Combo Pipe Clamps are designed to securely support copper, PEX, and CPVC tubing in various plumbing applications. These durable clamps feature a corrosion-resistant construction for long-lasting performance and can be easily mounted directly to brackets, studs, or walls for versatile installation. The one-piece design eliminates loose parts, streamlining the installation process. With their reliable performance and flexibility, Oatey Combo Pipe Clamps are ideal for both residential and commercial plumbing systems. For more information about Oatey® Combo Pipe Clamps, visit Oatey.com.

## *If you're planning a post-show write-up, feel free to include the products below.*

## *For standalone product coverage, please wait until the press release is issued.*

**NEW Dearborn Universal Pop Down® Sink Drain**

COMING SOON: Dearborn Universal Pop Down® Sink Drain – the ultimate sink upgrade. This innovative drain sits flush with the sink basin, providing a sleek and seamless look that takes the sink basin to new heights of sophistication. Its intuitive push-to-open and close, lift to clean design ensures effortless use and maintenance, and prevents items such as jewelry from falling down the drain.

Engineered for versatility, the drain is compatible with both overflow and non-overflow sinks, simplifying inventory management for wholesalers and retailers with just one SKU and giving service plumbers just one product they need to have on their truck. What's more, it accommodates any sink thickness or style, making this sink drain universally compatible with any sink. Available in Chrome, Brushed Nickel, Matte Black and Brushed Gold, it complements any bathroom style. The Dearborn Universal Pop Down Sink Drain elevates bathroom aesthetics and functionality, exemplifying a commitment to quality and innovation.

**NEW Dearborn Space-Saving Sink Drain Kits**

Dearborn Space-Saving Sink Drain Kits for single- and double-bowl sinks create extra space for under-sink organization, while also addressing challenges where sink placement in a new vanity doesn't align with existing plumbing.

Featuring an innovative design that simplifies installation, they come in single- or double-bowl bathroom and kitchen configurations, each optimizing under-sink space to enhance storage in bathrooms or kitchens.

Traditionally, plumbers have had to source and assemble individual components to address remodel challenges, such as misaligned wall outlets requiring custom offsets to connect to the drain. Dearborn Space-Saving Sink Drain Kits provide a convenient, all-in-one kit that streamlines the process. Each kit includes innovative components that maintain the traditional rigid tubular style, ensure compliance with stringent plumbing codes, save cabinet space and minimize cutting—delivering a smarter, more efficient installation solution.

The unique telescoping arms offer seamless vertical and horizontal adjustments, minimizing the need for pipe cutting. This innovation enables users to achieve professional-grade installations with ease, enhancing both functionality and aesthetics.

Homeowners will appreciate the extra space created for under-sink organization. By maximizing every inch, these drain solutions are perfect for those looking to expand and elevate their bathrooms or kitchens.

# Other noteworthy bathroom products and systems on display included:

### EXPANDED Oatey Decorative Drains

Oatey® Decorative Drains offer a stylish and functional solution for your shower with an elevated barrel and strainer design. Available in 4" and 6" square, and 24" and 32" linear sizes, these drains come in a range of trend-forward finishes, including stainless steel, matte black, brushed gold, champagne bronze, and (coming soon) gunmetal gray—designed to coordinate seamlessly with modern bathroom aesthetics.

As demand grows for both functionality and design, Oatey's decorative drains are now more widely accessible across wholesale and retail markets. Crafted from durable, corrosion-resistant 304 stainless steel, they feature sophisticated grate patterns, a sloped drain body for optimal drainage, and adjustable leveling feet for easy height adjustments. Additional features include built-in debris baskets and a sound-dampening band to minimize noise. Compatible with PVC/CPE shower pan liners and hot mop waterproofing, these drains provide both performance and style for professionals, remodelers, and homeowners alike. To learn more about Oatey Decorative Drains visit Oatey.com.

### Dearborn FLEX Bath Waste

The True Blue® FLEX by Dearborn® is the ultimate solution for overcoming jobsite obstacles in bath waste installations. It features highly adjustable tubing that effortlessly navigates floor joists, misaligned drains, and sloped walls—eliminating the need for multiple fittings and solvent-welded joints. Engineered for both residential and commercial applications, True Blue FLEX reduces installation time with integrated locking features that minimize tool usage. It is available in 16-inch and 24-inch lengths for Standard and Whirlpool tubs, and it comes in Full and Rough kits with a variety of stopper options, including Toe Touch, Uni-Lift, and Push N' Pull, in finishes like chrome, brushed nickel, and oil-rubbed bronze. It can be paired with a Direct Drain Fitting for added convenience to allow for easy P-Trap installation beneath the bath drain. True Blue FLEX delivers a faster, more efficient, and plumber-friendly bath waste solution.To learn more about Oatey® True Blue® FLEX by Dearborn®, visit Oatey.com.

## Oatey® Quiet Pipes® Hammer Arrestors

Oatey Quiet Pipes® Hammer Arrestors provide a reliable solution for eliminating water hammer and preventing noisy, banging pipes caused by sudden changes in water flow. These hammer arrestors ensure smooth operation in both residential and commercial applications, and are available in sizes ranging from AA through F. They accommodate a variety of pipe connections, including CPVC, 1807 PEX, 1960 Uponor, Copper (Sweat and Press), Male Iron Pipe, and Compression applications, and can be installed at any angle without compromising performance. With Oatey Quiet Pipes®, you get a durable and effective way to maintain a quieter, more efficient plumbing system. Check out this video to learn more about Oatey Quiet Pipes Hammer Arrestors or visit Oatey.com

## MODA® Supply Boxes

The Moda Supply Box System is designed to meet the needs of plumbing contractors for washing machines, ice makers, lavatories, toilets, dishwashers, and SureVent® Air Admittance Valve applications. A universal single box platform provides maximum versatility, installation simplicity, and rugged reliability. MODA Supply Box System is the ultimate solution for speed and flexibility. Available in standard, fire-rated and gas models, MODA modular boxes are made of durable PVC, so that plumbing-supply connections can be made PVC to PVC. The box itself can be mounted with a single screw to a behind-the-wall stud and set flush with the wall. Thanks to the two-piece design of the plumbing valve, no drywall needs to be cut during servicing: The tech simply removes the faceplate and disengages the copper LocPin™ clip holding the valve top and tail pieces together, removing the former in need of replacement. One universal faceplate is compatible with all MODA boxes. Check out this video to learn more about Oatey® Moda™ Supply Boxes, or visit Oatey.com.

## QuickDrain WallDrain Kits

The Oatey® QuickDrain WallDrain offers a seamless and unique solution for both curbed and curbless showers by integrating the drain into the wall itself, making it virtually invisible. The drain's magnetic vertical cover allows for nearly any solid surface tile installation. This complete shower system, including the pre-sloped shower pan and waterproofing, eliminates leaks and standing water. ADA and UPC-approved, the drain reduces installation time, saves costs, and minimizes disruption. Onsite adjustability accommodates shower lengths from 26″ to 96″, providing flexibility for various installations. To learn more about Oatey® QuickDrain WallDrain visit Oatey.com.

**QuickDrain ShowerLine Linear Drain System**

Ideal for curbed or curbless showers in single-family, hospitality and multifamily buildings, the ShowerLine PVC linear drain offers a cutting-edge look and sleek design. The integrated PVC drain, combined with pre-sloped shower panels and waterproofing accessories, represents a total shower solution for promoting effective and efficient drainage. The ADA-compliant and UPC-approved drain slashes installation time, saves on cost, and minimizes impact on customers.

Designed for use with ShowerLine Drain Kits, the Installation Kit includes a pre-sloped shower pan with curb and liquid waterproofing accessories. Pre-sloped shower pans reduce installation time by two days versus traditional dry-pack mortar beds. Comprised of extruded rigid PET (polyethylene terephthalate) plastic foam, the lightweight and shatterproof shower pans and panels are constructed from 100% post-consumer plastic water bottles. An advantage for architects and specifiers is that these recycled components may make an installation eligible for LEED certification points.

**Oatey® No-Calk Shower Drains with Universal Snap-Tite Strainers**

Oatey® No-Caulk Shower Drains are ideal for preformed shower stall bases. The durable PVC drain features a mechanically compressed gasket that secures to a 2” Schedule 40 DWV pipe, eliminating the need for lead caulking. A 4-1/4" round stainless steel strainer is included, and the drain seals to the base with fiber and rubber washers. Compatible with a variety of Oatey® Snap-Tite Strainers in multiple designer finishes. Easy to install with silicone sealant and no caulking required. To learn more about Oatey® No-Calk Shower Drains, visit Oatey.com.

Hi-res image Here.

**Oatey® 130 Series Shower Drains**

The Oatey® 130 Series Shower Drains are built for tile or marble showers that use shower pan liners. Constructed from durable ABS or PVC plastic, these drains come with Snap-Tite or Screw-Tite strainers, available in round or square designs with a variety of finishes such as polished stainless steel, brushed nickel, oil-rubbed bronze and more. A low-profile option for 1/4" tile is exclusive to Lowes and Home Depot. These drains are compatible with Oatey Designline/Vivante decorative drains and QuickDrain SquareDrain systems. Featuring a tool-free, reusable test plug, they can withstand up to 40 feet of head pressure, ensuring a reliable and straightforward installation process. To learn more about Oatey® 130 Series Shower Drains, visit Oatey.com.

**PVC Shower Pan Liner**

The Oatey® PVC Shower Pan Liner is a cost-effective, flexible waterproofing solution designed to provide a reliable seal for tile shower bases and other concealed applications. Crafted from durable, abrasion-resistant 40 mil thick PVC, this liner ensures long-lasting performance and protection. The kit includes a 5 ft. x 6 ft. pre-cut PVC Shower Pan Liner and two Oatey PVC Dam Corners. These pre-formed, flexible corners are designed to effectively seal the junction of the curb and door jamb, offering a universal fit for both right and left corner installations. With easy-to-read markings every 6 inches, the liner allows for precise measuring and trimming, ensuring a smooth, hassle-free installation. Ideal for tile shower installations up to 4 ft. x 5 ft., this liner is ready to use and meets ASTM Spec D4551 while being IAPMO listed. For optimal results, pairing the liner with Oatey X-15 bonding adhesive is recommended. To learn more about Oatey® PVC Shower Pan Liner, visit Oatey.com.

Hi-res image Here.

**Freestanding Tub Drain**

The Oatey® Freestanding Tub Drain Kit streamlines the installation of freestanding and island tubs, eliminating the need for access below the floor. Designed for easy connection to the DWV system from above, it requires only a 4-inch subfloor hole and fits seamlessly into 8-inch, 10-inch, and 12-inch joists. Made from durable ABS plastic, it's compatible with brass and Schedule 40 tailpieces, ensuring versatile plumbing integration. The kit includes a pre-installed, tool-free quarter-turn test plug for quick leak testing and a high-visibility protective cap to prevent tile-over. With its compact, innovative design, this drain kit simplifies installation while ensuring a secure, professional-quality fit. To learn more about Oatey® Freestanding Tub Drain Kits, visit Oatey.com.
